Career Objective

Recent B.Tech graduate with a strong interest in software development, seeking an opportunity to start my career as a Frontend, Backend, or Full Stack Developer. Passionate about learning new technologies, solving problems, and contributing to the success of the organization.

Education

Vaageswari College of Engineering, Karimnagar

2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 7.19 / 10

Trinity Junior College, Karimnagar

2020 – 2022

Intermediate (MPC)

Score: 654 / 1000

Kakatiya High School, Karimnagar

2020

SSC

CGPA: 9.2 / 10

Skills

Programming Languages : C, Python and Java (Basics)

Web Technologies: HTML, CSS

Databases: MySQL

Tools: Visual Studio Code , Eclipse

Operating Systems: Windows , Linux(Basics), Git

Experience

Software Engineer Intern

September 2025 – April 2026

Slash Mark IT Solutions (OPC) Pvt Ltd

Karimnagar

- Built Google Chrome extensions using JavaScript, Manifest V3, service workers, and content scripts for automation and integrations.
- Collaborated with cross-functional teams to convert requirements into functional and intuitive UI components.
- Optimized front-end performance to ensure faster loading, improved responsiveness, and scalability.

Projects

NEW CROP RAISING TECHNIQUES — *Java, HTML, CSS, JavaScript, MySQL*

- Implemented modern agricultural practices including precision farming, agroecology, and climate-smart cultivation.
- Developed a decision-support system to help farmers optimize irrigation, soil analysis, and crop selection.

BONE FRACTURE DETECTION SYSTEM — *Python, TensorFlow/PyTorch, YOLO, OpenCV, Flask, MySQL*

- Developed a secure web app for X-ray uploads, enabling authorized doctor access to patient reports and history.
- Integrated YOLO and CNN models for automated fracture detection using OpenCV and Flask APIs for real-time inference.
- Implemented role-based access, encrypted storage, and a user-friendly interface with a MySQL backend.

FAULT DETECTION IN POWER TRANSFORMERS (ML-BASED) — *Machine Learning, MySQL*

- Built ML models(SVM,Random Forest)to detect transformer faults using DGA data .
- Improved prediction accuracy through feature engineering and hybrid modeling techniques.

Certifications

- **Programming in Python (SWAYAM) – 2025:** Completed with a 79% score, covering Python fundamentals, problem-solving, and applied programming.
- **Cisco IoT Foundation (Gold) – Wipro TalentNext:** Gained foundational knowledge of IoT architecture, sensors, connectivity, and industry applications.
- **Java Full Stack – Wipro TalentNext (Digital Skills Readiness Program), 2025:** Completed full-stack training in Java, Spring Boot, REST APIs, and frontend technologies. Cert ID: TNext_SE_25_J_252330163.
